

Human Rights Caucus. Mike's range of expertise was astounding by any standards, and included China, Japan, Burma, the World Bank, trade policy and human rights as well as the entire range of U.S. foreign policy in Asia. He was the leading human rights voice condemning the 1989 Chinese military crackdown in Tiananmen Square, he was the most vocal advocate of ethnic groups such as the Tibetans in China and the Montagnards in Vietnam. Increasingly, Mike raised our awareness for issues pertaining to Afghanistan, the consequences of the military coup in Pakistan and the increase in religious fundamentalism in this area.

Mike, we all will miss you terribly. We will miss your voice of reason, your expertise, your enthusiasm and your humor, and most of all, your guidance, as we face new and troubling challenges and dangers emanating from a region of the world which is not easy to understand, but which had become a second home to you. Your life will be a constant reminder and challenge to all of us to try harder, to reach further in the defense of human rights, to believe in a better world and to never accept things as they are, unchallenged.

RECOGNITION OF CLIFF FIELDS

HON. JOHN SHIMKUS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 2003

Mr. SHIMKUS. Mr. Speaker, I rise before you today to recognize Cliff Fields of Jefferson County, Illinois. Cliff was recently inducted into the Senior Saints Hall of Fame of Jefferson County.

Cliff received this honor for his lifelong service to others. Whether it was his service in World War II or his work to bring business and industry to Mt. Vernon, he is known as an unselfish person who works tirelessly for the benefit of others. Fifty years ago Cliff founded the architectural firm of Fields, Goldman, and Magee. He has also served on the Summersville Grade School Board, Mt. Vernon Airport Authority, Economic Development Commission, Director for Mt. Vernon Savings & Loan and First Bank & Trust, and a Trustee for Mitchell Museum.

I want to congratulate and thank Cliff for all he has done and will continue to do for the people in his community. He is a saint to all who know him and is deserving of this prestigious honor.

THE FCC AND THE TRIENNIAL REVIEW

HON. MARTIN FROST

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 2003

Mr. FROST. Mr. Speaker, it has been over 3 months since the FCC completed their Triennial Review and voted on new rules for the telecommunications industry, the most significant change for that industry since the adoption of the 1996 Telecommunications Act. Yet, the FCC has still not issued the details.

This is a shame. So long as the FCC delays, uncertainty will reign in the tele-

communications sector. For one whole quarter now, investment and growth in the sector have been stalled.

Mr. Speaker, the economy remains weak, showing no real signs of recovery, and numerous companies continue to lay off their employees. The current recession has been hard on workers. Telecommunications companies are set to invest billions of dollars in network infrastructure—investment that will help the weak economy and create and preserve jobs—but the current regulatory environment restricts growth and investment in the telecom sector.

The FCC needs to act quickly and issue a ruling to help the telecommunications industry grow their networks, and help get America back to work.

IN HONOR OF GEORGE M. SCALISE

HON. ANNA G. ESHOO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 2003

Mr. ESHOO. Mr. Speaker, I rise today to honor George M. Scalise, who was recently named chairman of the Federal Reserve Bank of San Francisco.

George Scalise is a highly respected business leader in the high technology and semiconductor industries. As president of the Semiconductor Industry Association, SIA, George has distinguished himself as one of the premiere experts on the issues of international trade, competition, environmental safety and health, as well as workforce issues. In addition to his leadership of SIA, George Scalise serves on President George W. Bush's Council of Advisors on Science and Technology and on the boards of Cadence Design Systems and iSuppli Corporation. George previously served on the Boards of SEMATECH, the Semiconductor Research Corporation, and the Bay Area Economic Forum.

George Scalise is dedicated to investing in the education of future science and technology leaders. A graduate of Purdue University, George is on the advisory committees at the Leavey School of Business at Santa Clara University, the School of Engineering at the University of Southern California, the Engineering Visiting Committee at Purdue University and a member of the California Council on Science and Technology Fellows Program. He is also actively involved in the University Research Fund.

Mr. Speaker, I'm proud to have George Scalise as a constituent and my friend. He is one of the most effective and respected leaders in our country and our community, with a deep commitment to the betterment of our Nation. I ask the entire House of Representatives to join me in congratulating George M. Scalise on his chairmanship of the Federal Reserve Bank of San Francisco and wish him every success in shaping sound monetary policies for our country.

RECOGNITION OF DOROTHY BAKER

HON. JOHN SHIMKUS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 2003

Mr. SHIMKUS. Mr. Speaker, I rise before you today to recognize Dorothy Baker of Jefferson County, Illinois. Dottie was recently inducted into the Senior Saints Hall of Fame of Jefferson County.

Dottie received this honor for her lifelong service to others. She is a wife and mother who raised three children. Today she is a regular participant in the Sweet Corn & Watermelon Festival, the American Cancer Society's Relay for Life, Jefferson County's Crime Watch program, Memorial Day services, the Mt. Vernon City Wide Cleanup, and the National Day of Prayer. She has also assisted with the Emergency 911 Telephone Testing process. Dottie is active in her church where she helps the elderly and assists others in any way possible.

I want to congratulate and thank Dottie for all she has done and will continue to do for the people in her community. She is a saint to all who know her and is deserving of this prestigious honor.

INTRODUCTION OF "BAN ASBESTOS IN AMERICA ACT OF 2003"

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 2003

Mr. WAXMAN. Mr. Speaker, I am very pleased to introduce the "Ban Asbestos in America Act of 2003" in the House of Representatives. This is the companion bill to a bill that Senator Murray is reintroducing today in the Senate. Senator Murray has been a real leader in addressing the harm that Americans continue to suffer from exposure to asbestos. I thank her for her hard work on this serious problem.

We all know that asbestos can be deadly. It is a notorious carcinogen and causes other devastating diseases and disability. But what most Americans don't know is that this dangerous substance is still added, on purpose, to numerous products sold in this country. In 2001, companies in the United States used 13,000 metric tons of asbestos.

Sometimes it seems that people trust their government too much. Many Americans reasonably assume that since asbestos is harmful and unnecessary, and since Congress and EPA have taken action on asbestos, it must be illegal to add it to products. They assume that new products are safe in terms of risks from asbestos. In fact, EPA tried to ban asbestos years ago, but was sued and lost on some technical grounds.

The result is that people don't even know that some new products contain asbestos. And people don't realize that they still need to protect themselves against asbestos from these products. For example, many mechanics don't realize that asbestos is used in many brakes, exposing them and the public to dangerous asbestos dust. Asbestos is also still used in many roofing products and in gaskets. Continued exposure from new products is entirely avoidable—and this bill would fix the problem.

The "Ban Asbestos in America Act" also addresses other urgent needs related to harm from asbestos. It requires EPA, the Consumer Product Safety Commission, and the Department of Labor to establish a national public education program about the dangers posed by products with asbestos. For example, many homes in the United States contain vermiculite insulation in their attics—but most homeowners don't know that this vermiculite is often contaminated with asbestos. Homeowners and workers need to be made aware of the risk. People must be informed that they should not disturb this insulation. Yesterday EPA issued a brochure, but we need to do more to get the word out on this and other risks.

This bill also establishes a national registry for mesothelioma, a usually fatal form of cancer caused by exposure to asbestos. The registry will help scientists to better track and treat this terrible illness. The bill also authorizes funding for mesothelioma research and treatment.

We have not yet finished our job of protecting Americans from exposure to asbestos. We need a ban and public education about the risks that will remain. I'm introducing this bill to get the job done and make this country a safer place for people to work and live.

A TRIBUTE TO LUANA LAMKIN, AN ANGEL FOR CANCER PATIENTS IN OHIO

HON. DEBORAH PRYCE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 2003

Ms. PRYCE of Ohio. Mr. Speaker, I rise today to pay tribute to Luana Lamkin from Hilliard, Ohio, a former member of the Oncology Nursing Society's Board of Directors, and to celebrate May as the ninth annual Oncology Nursing Month. Oncology Nursing Month recognizes oncology nurses, educates the public about oncology nursing, provides an opportunity for special educational events for oncology nurses, and celebrates the accomplishments of oncology nurses.

The Oncology Nursing Society (ONS), the largest professional oncology group in the United States composed of more than 30,000 nurses and other health professionals, exists to promote excellence in oncology nursing and the provision of quality care to those individuals affected by cancer. As part of its mission, the Society honors and maintains nursing's historical and essential commitment to advocacy for the public good. ONS was founded in 1975, and held its first Annual Congress in 1976. Since the Society was established, 218 local chapters have been formed to provide a network for education and peer support at the community level.

In my State of Ohio there are more than 1,226 oncology nurses and health professionals that care for individuals with cancer and their families. In addition, Ohio has 9 local Oncology Nursing Society chapters located in the areas of Columbus, Cincinnati, Cleveland, Mansfield, Cuyahoga Falls, Lima, Zanesville, Whitehouse, and Dayton.

Luana Lamkin has been helping cancer patients and their families for the last thirty years. Luana is currently the Administrator of Cancer Services at the Grant/ Riverside Meth-

odist Hospitals in Columbus, Ohio. Luana has been active in the Oncology Nursing Society since 1976 and recently served as National Treasurer for the ONS' Board of Directors. She has received numerous awards for her work on behalf of individuals with cancer including the "Excellence in Nursing Administration" from the Oncology Nursing Society and the "Lane Adams Award" from the American Cancer Society for Outstanding Nursing Leadership.

Luana has also worked with the National Dialogue on Cancer on nursing workforce issues. A number of studies and articles that Luana has written on the impact of the nursing shortage on cancer care have been published in distinguished publications such as the Oncology Nursing Forum, Cancer Nursing: Practices and Principles, Seminars in Oncology Nursing, and the Journal of Nursing Research. Since 1982, Luana has presented thirty papers to national and international audiences on a host of cancer care issues such as staff support systems, role development, community resources, patient and caregiver perspectives, strategic planning, issues and trends in cancer nursing, epidemiology, screening, detection, negotiating professional rewards and nursing shortage issues.

Over the last ten years, the setting where treatment for cancer is provided has changed dramatically. An estimated 80 percent of all Americans receive cancer care in community settings including cancer centers, physicians' offices, and hospital outpatient departments. Treatment regimens are as complex, if not more so, than regimens given in the inpatient setting a few short years ago. Oncology nurses are on the front-lines of the provision of quality cancer care for individuals with cancer. Nurses are involved in the care of a cancer patient from the beginning through the end of treatment. Oncology nurses are the front-line providers of care by administering chemotherapy, managing patient therapies and side-effects, working with insurance companies to ensure that patients receive the appropriate treatment, provide counseling to patients and family members, in addition to many other daily acts on behalf of cancer patients.

With an increasing number of people with cancer needing high quality health care coupled with an inadequate nursing workforce, our nation could quickly face a cancer care crisis of serious proportion with limited access to quality cancer care, particularly in traditionally underserved areas. Without an adequate supply of nurses there will not be enough qualified oncology nurses to provide the quality cancer care to a growing population of people in need. I was proud to support the passage of the "Nurse Reinvestment Act" in the 107th Congress. This important piece of legislation, signed into law by President Bush, expanded and implemented programs at HRSA to address the multiple problems contributing to the nationwide nursing shortage, including the decline in nursing student enrollments, shortage of faculty, and dissatisfaction with nurse workplace environments.

I commend Luana Lamkin and the Oncology Nursing Society for all of their hard work to prevent and reduce suffering from cancer and to improve the lives of those 1.3 million Americans who will be diagnosed with cancer in 2003. I wish Luana and the Oncology Nursing Society the best of luck in all of their endeavors.

RECOGNITION OF DONALD BAKER

HON. JOHN SHIMKUS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 2003

Mr. SHIMKUS. Mr. Speaker, I rise before you today to recognize, Donald Baker of Jefferson County, IL. Don was recently inducted into the Senior Saints Hall of Fame of Jefferson County.

Don received this honor for his lifelong service to others. He served his country for 4 years in the U.S. Navy on the USS *Remy* during the Korean war. Today he is a regular participant in the Sweet Corn & Watermelon Festival, the American Cancer Society's Relay for Life, Jefferson County's Crime Watch program, Memorial Day services, the Mt. Vernon City Wide Cleanup, and the National Day of Prayer. He has also assisted with the Emergency 911 Telephone Testing process.

I want to congratulate and thank Don for all he has done and will continue to do for the people in his community. He is a saint to all who know him and is very deserving of this prestigious honor.

NEW SOCIAL SECURITY OFFICE IN HALLANDALE

HON. KENDRICK B. MEEK

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, May 22, 2003

Mr. MEEK of Florida. Mr. Speaker, I rise today to call to the attention of my colleagues the grand opening of a new Social Security office within my Congressional District in Hallandale, FL.

The new office will serve a total of 16,400 Social Security beneficiaries and 1,678 Supplemental Security Income beneficiaries in the cities of Hallandale, Hollywood and Dania Beach, FL. These cities, renowned for their thriving senior citizen populations, have shared a Social Security office in Hallandale since 1973. However, because this population has grown significantly over the decades, a new, more modern facility was needed in order to better serve the community.

The new office, located at 1000 West Hallandale Beach Boulevard, will include many innovative improvements, such as front-end interviewing and interactive video training by satellite from Social Security national headquarters in Baltimore, Maryland, and other locations.

I work closely with the Social Security Administration in answering questions and solving problems brought to my attention by my constituents, and I look forward to working for many years to come with Lee Rojas, the manager of this new facility, his full-time staff of 12 and his four special employees.

I applaud the Social Security Administration for its decision to expand its services and improve its proximity to the more than 18,000 retirees who have earned Social Security benefits and rely on Social Security's services.
